

PLPAK/ MRD

WE DESIGN YOUR SEISMIC PROTECTION SYSTEM

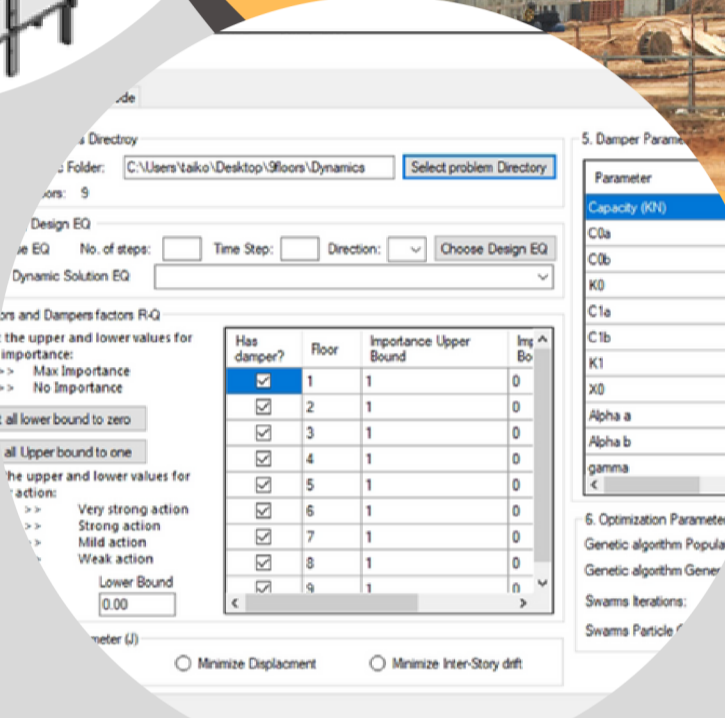

Irregular Structures

Preserve your structural integrity with our solutions

Our Service :

- Building Damper Solutions
- Earthquake Resistant Design
- Optimal Damper Control and Locations
- Specialized dynamic simulations
- Installation Consultancy

Reliable Simulations

Installment Support

Our Software and more info here: www.PLPAK.com

WE PROVIDE THE BEST CONSULTATION SERVICES

MR DAMPERS

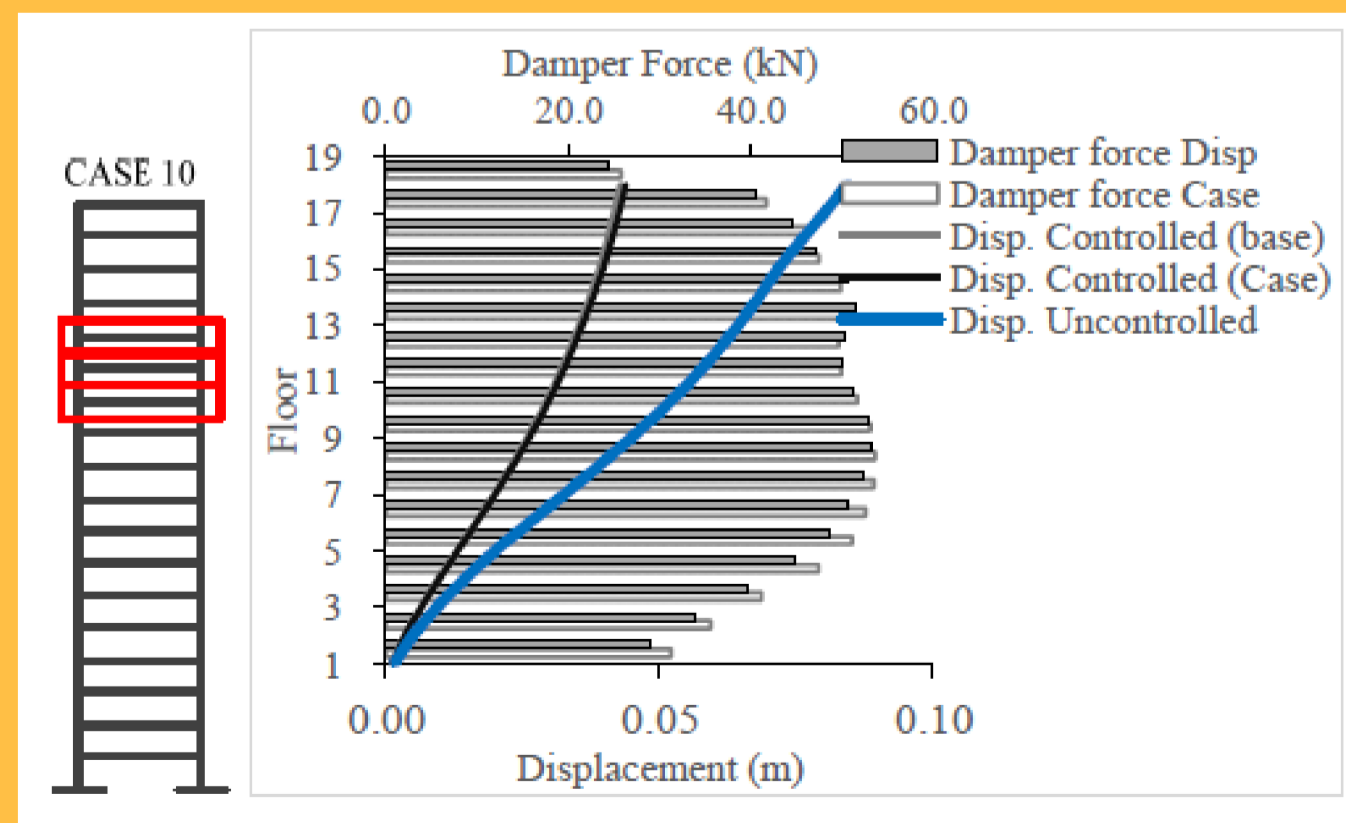

We use Magneto-rheological dampers (MR-Dampers) to reduce the dynamic response of structures to seismic activities or severe wind loading.

DISASTER MITIGATION

Our MR dampers can significantly reduce the risk of injury and damage caused by earthquakes, protecting the people and property inside the building.

INCREASED BUILDING LIFESPAN

By reducing the stress and strain on the structure during seismic activity, our MR dampers can help extend the lifespan of your building.

Significant displacement reduction
